April 2020

A Newsletter for Residents of Cañon del Sol

Volume 3, Issue 3

## PRESIDENT'S MESSAGE

Given the *shelter in place*, *social distancing* and other movement restrictions arising out of the COVID-19 pandemic, matters here at Canon del Sol have been very quiet. Second-home owners seem to have mostly stayed at their principal residences. The streets are essentially empty with full-time residents staying inside except to walk dogs, get some exercise and grocery shop. The pool, spa and tennis courts, and now the parks and the beaches, have been closed. To my knowledge, we have no reported cases. Our sincere thanks go out to all health care workers and others providing essential services.

As a consequence of the movement restrictions, all development improvement activities within Canon del Sol, including landscaping on the operating side and the painting of Section A on the reserve side, are essentially on hold. These activities will be re-started when permitted. The two most significant areas of concern going forward are: (1) the repair and replacement of the irrigation system; and (2) siding repairs in Section A. With respect to Section A siding, as previously reported, given the inferior nature of the materials used in original construction, as well as age deterioration, significant siding repairs will have to be made before painting can be undertaken. Warping in the siding is readily apparent and, delays in implementing repairs are a negative consequence.

The Canon del Sol Association Bylaws require annual election of directors. Directors serve two-year terms. Traditionally, these elections have been held at the annual Members' Meeting, even though this is not required by law or our by-laws. In fact, as the recent distribution to Members indicates, the state legislature has enacted new laws regarding director elections. Given the postponement of the annual meeting of Members and the inability to set a new date, the Board has adopted the new rules and is taking steps to go forward with this year's election by mail in accordance with such rules. You will receive more information about this in the near future.

Thank you for respecting the *shelter in place* and *social distancing* directives.

Henry Bose

## Omega-3s: Should You Take Them?

The findings of two large studies, recently conducted, found that Omega-3 fatty acid supplements have almost no effect--good or bad--on the risk for cardiovascular disease or cancer.

Both the American Heart Association and the American Cancer Society continue to recommend omega-3s, but these studies do not support those recommendations.

One study was an update in The Cochrane Database of System Reviews and resulted from 28 high-quality trials; the other was published in The British Journal of Cancer.

As always, ask your doctor whether omega-3s are right for you.
